Archived

Date of Construction: April 2023.

A sustainable project made with a 100% recycled leather shell gathered from unused leather jackets that were taken apart and cut into individual pieces and reconstructed back together to form the shape of the bomber jacket.

A dark silver grey lining inside adds comfort and shine, cotton rib knit finishes its cuffs, collar and bottom hem with a stainless steel zipper for accessibility along with single flat welt pockets in the front of the jacket.

Style your jacket:
